Experience

Founding Engineer & Tech Lead
Fullview

Nov 2021 - Present (1 year +)
Building cloud web applications that help people connect and handle business better, faster, and more reliable. With an async mindset, I'm trying to decouple complex web structures and components to generate reactive self containing services (RSCSs) able to handle stress factors from various sources.

I'm also working with an awesome team to deliver the right balance between software quality and software readiness. Startup world is a challenging ecosystem, and you should always be ready to React (no pun intended) to what's happening around you. And that might be changes to your product, software, goals, team, mindset!

But... what do I really do each day? Well, I'm in charge of BackEnd product architecture, development, cloud architecture (AWS) + bridging the team and many more (meme maker as well)!

If you're interested in what we do, our door is always open to discuss and interact, be it for a hiring position, or just sharing / talking about technology topics.

Co-Founder & Lead Developer
God Mindset

Aug 2020 - Present (2 years 3 months +)
God Mindset started as a free Christian podcast aimed at teens wanting to discover more about God. The podcast functions as an interview based podcast, where we gather questions (anonymous) via our platform, and we interview theologians on that questions.

Software Architect
GoodLeap

Nov 2021 - Mar 2022 (5 months)
Key topics:
Fintech. AWS cloud. NodeJs solutions. Typescript. Microservices. Lambdas.

Working with Amazon AWS, providing serverless / lambda solutions written in NodeJs (TS/JS) to provide friendly financing options for those who dream of living a more sustainable lifestyle and want to save money using modern technology.

GoodLeap's vision:
"We are a digital conduit connecting the world's growing sustainability marketplaces. We provide frictionless, point-of-sale technology for countless mission-driven professionals and millions of people who seek to live more sustainably."

Technical Team Lead
GoodLeap
Oct 2021 - Mar 2022 (6 months)
Leading a team of 7 people to deliver funding solutions and support building cloud native apps and SaaS's!

Key topics:
Fintech. AWS cloud. NodeJs solutions. Typescript. Microservices. Lambdas.

Working with Amazon AWS, providing serverless / lambda solutions written in NodeJs (TS/JS) to provide friendly financing options for those who dream of living a more sustainable lifestyle and want to save money using modern technology.

Project Lead Developer

ShutterRead

Dec 2019 - Dec 2021 (2 years 1 month)

We're developing a speed reading app. You can check the POC by accessing https://shutterread.com
All comments and feedbacks are welcomed.

Currently working on an electron (desktop) version of the application!

Senior .NET Developer

Code4Nord

May 2020 - Aug 2020 (4 months)

.NET developer on an ERP application for a danish customer.

In charge of the development of the application by fixing existing / known bugs, and adding new functionalities, such as interactive resource scheduling panels, dialogs, views, data-manipulation sheets etc.

It's a one man project with a daily interaction with the PO and the owner of the application, interactions aimed at yielding the best result for our customer and his business.

The business has more than 100 individual clients, and the project at hand is rewritten from an existing WinForm software solution to a more modern WPF DevExpress solution. Currently we're stabilizing the application and integrating new features as we approach a major release.

Duties in this project range from requirement gathering, to team management, to application implementation, to software testing etc.

Being a one man show, it requires a lot of individual responsibility and focus, but it also lacks in the teamwork department, as there is no actual team to work with. Still, the software is growing, under the direct supervision of the owner (client), with great results.

"Our partnership with Code4Nord has been a successful one. Throughout the project we've worked with highly skilled developers that have complemented our own skills and culture well, resulting in an excellent output. The team's integrated mode of operation with daily meetings, sprints and tasks have kept momentum high and made our combined efforts very productive." — Flemming Østergaard, CEO

Specifications:
- .NET 4.7.2, WPF, DevExpress 20.1.3.0

Senior Web Engineer

Code4Nord

Sep 2019 - May 2020 (9 months)

Full-Stack NodeJs / React - PHP 5.6 / Angular x

Work domains:
- system development (Fullstack php/angularJs, backend NodeJs)
- system maintenance (Heroku/Github/proprietary systems - similar to DevOps)

- system migration (incremental deployments, continuous integration, migration from old php/angularJs to NodeJs).

.NET Developer
NTT DATA Romania
May 2018 - Aug 2019 (1 year 4 months)
Working on a WPF financial tool for one of Germany's leading Insurance Companies (RuV). I write reliable backend solutions for our WPF application that handles temporal financial indices for insurance contracts.

Mentor
NetMatch
Dec 2017 - May 2018 (6 months)
Mentoring NetMatch's intern team.

Student Mentor
NetMatch
May 2017 - May 2018 (1 year 1 month)
Mentoring groups of high school students in discovering their passion for programming.

via DPIT.ro

Javascript Developer
NetMatch
Jun 2016 - May 2018 (2 years)
Main technologies:
AngularJS (4/5)

Traits:
ES6
Typescript

Source Control:
GIT

Technologies:
Boostrap

.NET Developer
NetMatch
Oct 2014 - May 2018 (3 years 8 months)
Backend (main):
Asp .Net, C# 6.0
.Net Core 2.0+

Web:
Html
CSS
JavaScript = [CanJS, jQuery, iScroll,nodeJs,react]

Agile development (SCRUM, KANBAN)
Environment: Jira, GitLab

Source controls:
- Git
- TFS 2015 (TFVC)

Deployment:
- Teamcity

Selenium (automatic testing)

.NET Intern
NetMatch
Aug 2014 - Sep 2014 (2 months)
• .Net MVC projects
• CanJS MVC projects.

Junior PHP Web Developer
Bettersoft
Jul 2013 - Oct 2013 (4 months)
Learning, understanding, applying.
Technologies:
PHP 5.4 - 5.5
Zend2

Education

Universitatea „Babeş-Bolyai" din Cluj-Napoca
Master's in Software Engineering, Computer Science
2014 - 2016

Universitatea „Babeş-Bolyai" din Cluj-Napoca
Bachelor of Science (BS), Computer Science
2011 - 2014
Learned all the things that mattered.

Liceul Teologic Baptist Emanuel
Baccalaureate, Theology and Religious Vocations
2007 - 2011

Learning things, mostly on how to assimilate future ones.

Music School - A.Bena / S.Toduta
Music degree, Piano
1999 - 2011
Piano 1999 - 2011
Guitar 2007 - 2011
